Electrical Current

December 7, 2017 2:14 PM

Electrical Currend. - When it begin to flow they carry electrical charge. the elementary charge is the charge that is carried by let charges are measured in coulombs (C) the elementary charge is represented by 1.6 × 10¹⁴ ($\rightarrow Q = N \cdot \ell$ Charge (C)

| | Ka |
|---|----|
| - how many & are represented by IC Q = 1C N = Q = 1k = 6.25 × 16 ⁸ & R = 7. bx10 ⁻¹⁹ C - electrical current represents the number of coulombs that passes by any point in a circuit in 1 second rejulants | |
